Claim.MD has been a leading EDI clearinghouse for more than 40 years, processing tens of millions of transactions every month. Many of our first providers are still customers to this day, as our products and services are – and continue to be – designed with the provider in mind. Claim.MD is affordable and powerful – a system of tools to send simply clean claims the first time.

With Claim.MD, providers are able to enjoy increased cash flow by streamlining their electronic transactions. This not only gives them complete control over their claims from filing to payment, it reduces costly staff time to research and correct rejected claims. When claim follow-up with a payer is necessary, Claim.MD simplifies the process with a complete and readable Claim History that can be printed for proof of timely filing. And when claims are rejected, that's when Claim.MD really shines – managing the return process, speeding payment, and eliminating the confusion of re-billing.

Claim.MD Helps Healthcare Providers, Software Vendors and Insurance Carriers Manage Electronic Medical Transactions Easily.

Visual tracking allows providers to easily see issues and collection trends as billing situations change in our industry.

Extensive insurance network links providers to Medicare, Medicaid, Blues, and thousands of commercial insurance companies across the country.

Fastest claim processing and submission times. Hands down.

Online support with one-click access to claim-level answers directly from our technical response team.

No special software required. Create claims online in our simple, easy-to-use portal or upload claims from your current billing application and easily make additional corrections.

Beautiful visual reporting gives easy access to dive directly down to the claim-level detail in a way that's superior to traditional reporting.

Have Confidence in Your Claims

We've always been committed to providing simple and secure transactions between providers and payers while exceeding industry-established standards. Our EHNAC HNAP accreditation and CAQH CORE certification are testaments to our dedication in ensuring the thousands of providers, payers and software vendors who turn to Claim.MD to streamline their revenue cycle needs can do so **confidently**.
